<u>Horn of Fog</u>	PF Core
<i>Aura:</i> faint conjuration. <i>CL:</i> 3. <i>Slot:</i> –. <i>Price:</i> 2000gp. <i>Weight:</i> 1lb.	
This small bugle allows its possessor to blow forth a thick cloud of heavy fog similar to that of an <i>obscuring mist</i> spell (concealment (20% miss) at 5ft, total concealment (50% miss) beyond, removed by fire, doesn’t work underwater). The fog covers a 10-foot square next to the horn blower each round that the user continues to blow the horn; a fog cloud travels 10 feet each round in a straight line from the emanation point unless blocked by something substantial such as a wall. The device makes a deep, foghorn-like noise, with the note dropping abruptly to a lower register at the end of each blast. The fog dissipates after 3 minutes. A moderate wind (11+ mph) disperses the fog in 4 rounds; a strong wind (21+ mph) disperses the fog in 1 round.
